Project Name	Agri-Tech (Smart Farming Management System)
Maximum Marks	4 Marks

Empathy Map Canvas:

Understand the needs, frustrations, and behaviors of farmers seeking reliable, data-driven guidance for their crops through a platform like Agri-Tech.

Persona: Small-scale farmer managing 2–5 acres, with limited internet access and mixed literacy; relies on experience, neighbours and local traders for advice.

SAYS

- "The rain came early again, I lost half my sowing."
- "I don't know which fertilizer my soil really needs."
- "Agents sell at their price; I have no choice."
- "I wish someone could explain this in my language."

THINKS

- Will this season's weather ruin my yield?
- Is my soil still healthy enough for this crop?
- Technology looks complicated and costly.
- Can I trust a phone app over my own experience?

DOES

- Checks sky, wind and neighbours' fields to decide when to sow or irrigate.
- Visits the local shop or an expert for pest problems.
- Keeps crop and expense records in a notebook or memory.
- Buys seeds and fertilizer from nearby dealers.

FEELS

- Anxious about unpredictable weather and pests.
- Frustrated by lost crops and low market prices.
- Left out by apps that are not in his language.
- Hopeful when guidance is simple and timely.

PAINS

- Late or missing pest and weather alerts.
- No easy way to test or track soil health.
- Limited access to agricultural experts.
- Middlemen and unclear resource prices.

GAINS

- Higher crop yield and reduced loss.
- Timely, local, multilingual alerts.
- Expert advice and community support in one place.
- Easy ordering and tracking of farm resources.
